

PERMIT TO WORK

Manage, Share & Monitor PTW efficiently

CUSTOMIZED PERMITS

The existing format of safety permits can be configured easily with respect to content, process flow, checklist etc.

PERMIT IN LOCAL LANGUAGE

The permit can be set in two languages (English + Other). The entire permit can be set and printed in two different languages.

BETTER JOB PLANNING

The safety permits can be generated in advance (for a future date) for shut-down activities to improve job planning and you can edit them any time to release.

SHARE VIA EMAIL, WHATSAPP

Permit files in PDF can be shared via email, and WhatsApp with the users instantly. You can share externally as well.

CLONE PERMITS

You can clone permit from past permit. Regenerating the permit from past history is very simple and quick.

EXPORT PERMIT DATA

Permit data along with the status of any size can be exported easily with a click into an excel sheet, PDF file, and print.

REDUCE PERMIT ERRORS

The application easily identifies safety control measures, PPEs requirements, and checkpoints for approval. Thus certain errors can be reduced.

NO ISOLATION VIOLATIONS

An electric supply restoration request is not possible until the safety permit is unlinked and closed.

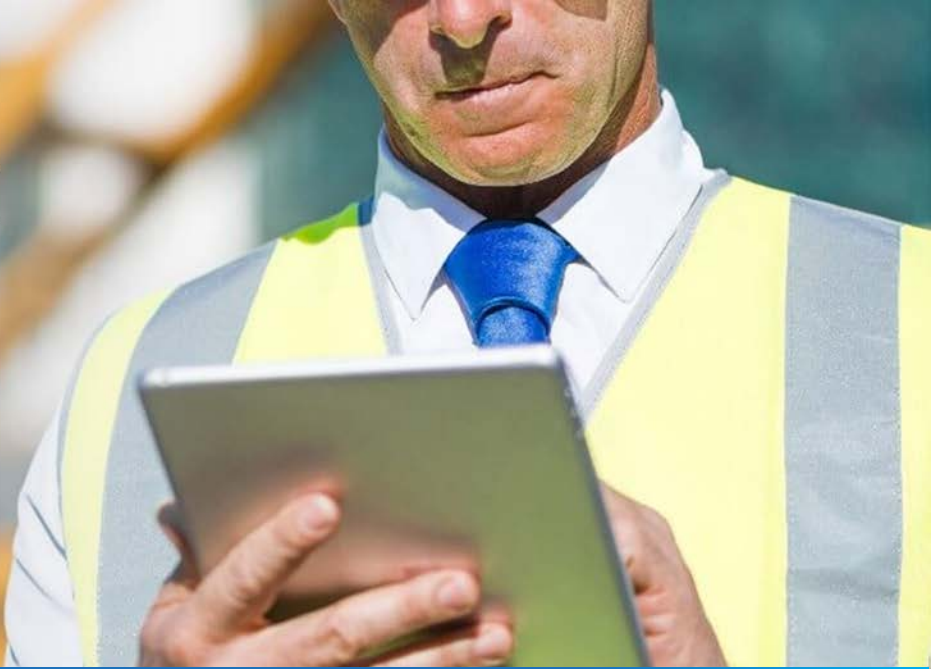

Permit To Work software is a cloud-based application. You can generate, review and approve safety permits electronically in simple & easy ways. Regenerate safety permits with a click that saves a lot of time. You can send safety permits via email, text message or WhatsApp. Compiling & monitoring safety permit status becomes easy. You can easily generate hot work, cold work, confined space, height work, isolation, lifting, hazardous chemical permits, etc.
